HX-9100 Dew Point Sensor

Description

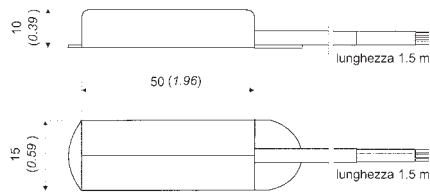

The HX-9100 Dew Sensor is used to prevent condensation on surfaces such as cold water pipes, cool ceilings and windows. The HX-9100 can be connected to Johnson Controls System controllers to provide override functions when condensation is forming.

Features

- Determines precisely the dew point with electronic measurement
- 0...10 V or open collector output
- Cable length 1.5 m

HX-9100
Dew point Sensor

Dimensions in mm (inches)

Selection Table

Output	Output at Condensation	Power Supply	Ordering Codes
ON/OFF	Open collector closed 0.5 VDC max	15 VDC ±10%	HX-9100-8001
0...10 VDC	≤ +0.5 VDC		HX-9100-9001
